Eliminate Collisions with our Large Door Protection System

Safe to Close

Monitoring door area

Door Control Panel with Built-in Diagnostics

44' wide x 15' high door

 = Sensor Location

- Faster opening speed helps protect door. Door opens 2-3times faster than original speed. Large doors can operate at speed up to 48" per second. Our system utilizes the existing Motor and Operator.
- Intelligent sensors recognize patterns of entry and exit and prohibit door closings prematurely. These sensors track the trucks' movement up to 500-feet from the door
- Thru-beam style photo-eyes insure safety and reverse door for additional protection directly in the door opening
- Intelligent controls defend against human error. In "automatic-mode", should a forced-close be attempted, the system will report the source and prohibit the operation
- Built-in diagnostics minimize repair time and maintenance by tracking cycles for recommended maintenance. Should the systems detect a point-of-failure or collision, it alerts you via a 4-line digital display pinpointing the exact problem area
- Audible alarms warn of impending collision

OUR EQUIPMENT IS NOT BRAND SPECIFIC AND WORKS WITH YOUR EXISTING NEW OR USED EQUIPMENT!

Eliminate Collisions with our Large Door Protection System

Monitoring Exterior for Presence

Monitoring Exterior for Motion

Sensors have a range up to 500-ft from door opening

Long Range Radio Controls up to 2000-ft

- Our automated door opening/closing system eliminates human error, improves safety and productivity by minimizing collisions
- Advanced Door Systems controller increase the opening speed of an existing door by 2-4 times the original speed. Higher opening speeds prevent the door from getting *hit!*
- Safety is increased with independent adjustable Closing speed
- Smart control panel prohibits door from being hit or closing on a person or vehicle
- Long distance radio controls allow individual door opening from up to 2000-ft using your existing two-way radio
- High intensity LED lights communicate proper door position
- Approach sensing up to 500-feet from the door opening
- Built-in diagnostics for easy trouble shooting
- False open/closing cycles are eliminated
